

the twist collection by alain mikli

alain mikli dresses the eyes – his passion –
composing an ode to his favorite material: acetate.

to remain faithful to provocation, his all-time muse,
he decided to let the looks dance by designing twist,
his new collection.

in the 80's the emblem of alain mikli's creations
was asymmetry, with glasses to see as well as to
be seen.

today, alain mikli pursues his ideal and renews his
art of asymmetry. he lets the material sway, moving
to the tempo creating a look that swings.

he thus lets the wearer become enticing, his
character hops while his personality sways.

twist: beyond a promise or an attribute, alain mikli
frames let the looks dance.
