

# alux biostar

---

## material:

alux, technological challenge of a combination especially designed for cutting and stamping

## coating:

anodizing specific to alux.

- it penetrates a few microns deep into the material
- it protects alux against any atmospheric aggressions
- it allows to develop beautiful bright and satin-like colors

## the plus:

- frames in limited edition
- bright colors that are rarely used in the starck eyes collection
- the lightness and technicality of the alux frame
  
- temples are lined with thermolast for an extreme comfort
- the **biolink adapts perfectly to the wearer's head shape** and gives a feeling of unequalled lightness
- CR39 graduated and logotyped zeiss lenses for an excellent protection against the sun

## for whom?

for men & women who dare strong colors for their eyeglasses or sunglasses

## where and when?

for the city, for the day or the evening, depending on the wearer's mood

## why?

amadou and mariam, biostars of the starck eyes brand wear these frames in all circumstances. they wished to have frames that would match the bright-colored outfits they wear on a daily basis. alain mikli and philippe starck designed with them these bright colors. these color schemes are now accessible for pocket shops.
